

## 1 Screenshots / Demo Flow

Issuance and Verification flows local

Issuance page:

The screenshot shows the 'Kube Credential' application interface. The 'Issue Credential' form is filled with the following data:

- ID: cred-101
- Name: Jayesh Phale
- Course: Full Stack Development

The 'Issue Credential' button is highlighted in blue. Below the form, the JSON response is displayed:

```
{  "message": "credential issued by worker-local-worker"}
```

The 'Status' panel on the right indicates the local backend is active (issuance @ 5000, verification @ 6000) and provides instructions for Kubernetes deployment.

The screenshot shows the 'Kube Credential' application interface. The 'Issue Credential' form is filled with the following data:

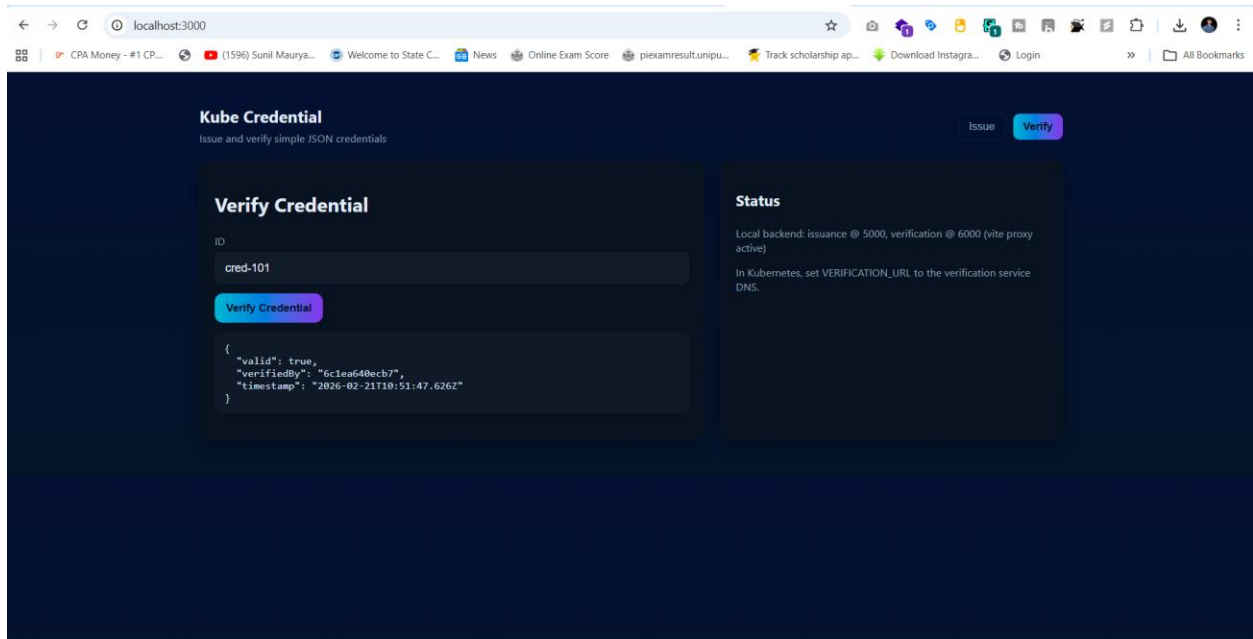

- ID: cred-101
- Name: Jayesh Phale
- Course: Full Stack Development

The 'Issue Credential' button is highlighted in blue. Below the form, the JSON response is displayed:

```
{  "message": "credential already issued"}
```

The 'Status' panel on the right indicates the local backend is active (issuance @ 5000, verification @ 6000) and provides instructions for Kubernetes deployment.

Verification page:
